Total Story

Story Points

Velocity:

Sprint 1: 1 user stories x 20 story points = 20

Sprint 2: 1 user stories x 20 story points = 20

Sprint 3: 1 user stories x 20 story points = 20 Sprint

4: 1 user stories x 20 story points = 20

Total = 80

The average sprint velocity is $80 \div 4 = \mathbf{20}$.

Burndown Chart:

A burndown chart is a graphical representation of "**WORK LEFT to do versus TIME**". It is the amount of work that has been completed in an epic or sprint and the total work remaining. burndown charts are used to predict your team's likelihood of completing their work in the time available.
